

# WESTMINSTER DS™

The fireplace insert decoflame® Westminster DS™ is the perfect solution when challenged with the task to restore an old, redundant fireplace or merely the opening remaining in a chimney breast from a previously installed gas fire to their former glory.

Unlike Westminster™ the Westminster DS™ is a one-piece fireplace, easing the installation. Just like the Westminster™, this fireplace can be manufactured in order to fit into an existing fireplace opening or mantelpiece. It also allows a choice of burner - either a Denver e-Ribbon Fire™ or manual burner.

Decór details to front and frame are optional.

<b>Finish</b>	Powder-coated aluminium and decór in steel or brushed/polished stainless steel	
<b>Dimensions</b>	Width and height:	made-to-measure
	Depth:	min. 247mm
