Elena	-	-		

1) The flue calculation values apply for countries that require flue calculation in accordance with the DIN 18160 and DIN EN 13384 standards. It is recommendable to contact chimney sweeper beforehand.

2) When installing with bottom plinth, flue connection (+70mm) will be raised according to thickness of the plinth.

Take a notice of the countryspecific approvals in section 3

NOTES!

The flue heat category required by the fireplace is T350.

The recommended minimum flue height is 5 m with Ø180 mm. In countries where the flue calculation is required, should the calculation be done according to the instructions and regulations of the flue calculation.

A damper designed for adjusting the draft is always recommended for a flue connection or flue.

Country- and region-specific regulations must be adhered to when installing the fireplace
