**Sunday**<sup>®</sup>  
The new way of grilling

# With a BBQ, it's always party time!

A barbecue on  
a cool summer  
evening:  
a special way to  
spend time with  
friends and family,  
outdoors, making  
merry, eating  
delicious healthy  
food.

**Sunday**  
The new way of grilling

# Materials and finishes.

**Significant aesthetic value, use of marble chips with natural colours, long lasting durability, revolutionary Crystal worktops, high heat resistance making it possible to use wood. The quality and sturdiness of Sunday materials can be recognised at first sight.**

**Here is an overview of the existing finishes in the range.**

	BASIC	STONE	CRYSTAL
<b>BIANCO CARRARA</b> Cultured marble			
<b>DECOR BRICK</b> Cultured marble			
<b>NERO GALAXY</b> Cultured marble			
<b>ROSA ASIAGO</b> Cultured marble			
<b>SILVER GREY</b> Cultured marble			
<b>RED ELEMENTS</b> work tops, risers, roofs, fireboxes pre-hoods, structures.			

Finishing/colour combinations are not customisable.

## Certifications and quality

**Over the years, Sunday has stood out for its commitment to complying with the main and strictest regulations and certifications in force, guaranteeing the best quality of its products.**

Certifications  
EN1860  
EN498

Agencies  
IMQ  
TUV  
GASTECH

Quality Control  
AQL4

**We have  
a top plan  
to keep  
the barbecue  
always nice  
and clean.**

## **Crystal**

**Building upon the strong Italian marble and stone working tradition, Sunday® has created the new Crystal smooth finish for its BBQs. The tops and fireboxes in precious reconstituted granulated marble are processed with high precision to obtain a finish which is shiny and smooth to the touch, also ensuring easier surface cleaning.**

# **Melody.** **Cooking** **outdoors,** **in style.**

**With its wide smooth Crystal tops that facilitate cleaning, the elegant lines and rich outfitting which include sink, gas cooker and the new gas grill with lid, Melody is a new concept of the outdoor kitchen, easy and versatile.**

# Typical compositions: Melody 5

Optional cooking feature, with built-in cooker, thus preventing unpleasant smells from lingering in the house; plus the convenient hot plate accessory in cast iron which is standard supplied

The BBQ works with wood and charcoal, is fitted with a biologic cooking rack for fat-free cooking

"Easy fire" ventilated brazier to make embers in half the time

Optional sink feature to be able to prepare food directly in the garden

Tops made with smooth **Crystal** finishes, to ensure easy surface cleaning

## Individual element codes

### Melody:

Melody Acqua Crystal	5714007
Melody BBQ Crystal	5714004
Melody Fornello Crystal	5714008
Melody Grill Crystal	5715004
Melody Isola Crystal	5714009
Melody anta Bamboo	4009025

Doors made in solid wood

Convenient support shelves

Rotisserie-ready

Wide cooking surface with enamelled plate for easy cleaning

Optional gas grill feature for even easier and quicker cooking; flame distributor system which does not require lava rock

# Metal ovens.

## Why use the oven?

- 🔥 Conviviality and culinary pleasure.
- 🔥 Possibility to cook for many guests.
- 🔥 Cooking with no smells in the house.
- 🔥 Environmental friendliness and savings: cooking with Sunday ovens® is 10 times less expensive compared to an electric oven and 5 times less than a masonry oven.
- 🔥 Italian tradition with advanced cooking performance.

# 1 Multichef®

**Perfect cooking with no smells being transferred between different dishes.**

**Sunday ovens®**, thanks to the exclusive cooking chamber technology and pyrolysis ventilation system, allow baking vapours to be abated, thus preventing smells being transferred between different dishes.

**The enveloping radiant convection system, a refined Sunday solution®, consistently distributes heat via the nozzles located in various parts of the oven.**

Oven operation diagram

Cooking chamber

Cooking smoke and smells are eliminated thanks to pyrolysis, thus allowing various foods to be baked simultaneously.

Diffused heat for consistent baking.

The hot air is sucked in by the cooking chamber and conveyed through the side ducts.

# 2 AutoClean®

**An exclusive system which keeps the oven cleaner.**

**Baking vapours and smoke are abated by a special pyrolytic system leaving the oven a lot cleaner compared to products available on the market. Moreover, the double glass which thermally insulates the heating and cooking chambers always stays cleaner. Finally, when oven cleaning is necessary, the operation is decidedly easier thanks to the possibility to completely remove all the walls of the cooking chamber, including the rear and top.**

**Less time for cleaning, more time for yourself!**

Completely removable cooking chamber

Cooking chamber

Baking steam and smoke is abated thanks to the pyrolytic system, leaving the cooking chamber cleaner.

# 3 Fireblade®

The heat does not escape when the door is opened.

Unlike what happens with traditional models, in Sunday ovens® the door may be opened, drastically limiting heat escape without needing to turn off the ventilation system.

Finally with Fireblade® the perfect soufflé is guaranteed.

Thermal break

Cooking chamber

# 4 Comfort Air®

**From now on, the oven,  
in addition to baking,  
will also warm you.**

**Thanks to Comfort Air®,  
the revolutionary system patented  
by MCZ which gives you the  
possibility to duct hot air up to  
8 metres, while you are baking  
with the oven, you can also heat  
several rooms in your home.**

**Environmental friendliness and  
savings  
in heating expenses,  
comfortable rooms.**

**Detail of the rear portion  
of the oven compatible  
with Comfort Air® system**

**8-metre ducting**

**Double glazing** 🔥🔥🔥

The double glazing in the cooking chamber and in the hearth are conducive to excellent thermal insulation and consequent savings. This feature also offers a high degree of protection and safety compared to the most widespread models on the market.

**5**

**Refractory material surface** 🔥🔥🔥

On all Sunday ovens,<sup>®</sup> the refractory material surface is standard supplied.

**11**

**Baking steam adjustment** 🔥🔥🔥

Anyone who cooks knows how important it is to be able to adjust the baking steam outlet: food baked to perfection, the crust on the roast, bread that does not shrink are the most common advantages. In order to guarantee these results, the Premium and Arcos models have been fitted with a suitable baking steam outlet adjustment valve at the front.

**6**

**Air grid** 🔥🔥🔥

Combustion is controllable via the adjustable air inlet grid.

**12**

**Smoke adjustment** 🔥🔥🔥

The exhaust smoke closing valve lets you maintain the heat inside the oven and, unlike most of the other ones, is located on the front for better more convenient use.

**7**

**Instrumentation** 🔥🔥🔥

Complete instrumentation with thermometer and timer.

**13**

**Stainless steel door striker** 🔥🔥🔥

In order to assure the best hygiene and facilitate cleaning, Sunday ovens<sup>®</sup> are fitted with a stainless steel door striker frame, completely preventing the risk of rusting.

**8**

**Foldaway top** 🔥🔥🔥

The oven cart (optional) is fitted with a convenient foldaway steel top, handy to support serving plates or oven trays.

**14**

**Stainless steel cooking chamber** 🔥🔥🔥

To guarantee hygiene and longest-lasting efficiency, the 3-level cooking chamber is entirely constructed in precious AISI 304 BA stainless steel or 430 BA stainless steel. In Premium models, perfect lighting of the cooking chamber is assured by using two internal lamps located on the sides which emit a diffused, never unpleasant light.

**9**

**Accessory** 🔥🔥🔥

Three-year warranty. Complete terms in the warranty booklet.

**15**

**Aluminised steel** 🔥🔥🔥

In order to assure maximum weather resistance, the structure is entirely in aluminised steel and the exterior in stainless or powder painted steel.

**10**

**Warranty** 🔥🔥🔥

Sunday<sup>®</sup> ovens are abundantly outfitted as standard, including a square tray and two wire racks.

# Ovens in refractory material.

Ancient flavours and natural gestures connected to tradition and the joy of cooking with your own hands. Sunday offers vault ovens entirely made in Alutec<sup>®</sup>, an innovative refractory material with high alumina content (70%), designed to withstand high temperatures and conserve heat, at the same time as assuring long lasting efficiency over the years.

# Recommendations for installation

## Installation site

Ovens in refractory material can be installed indoors or outside, as for instance porches.

The components of the base and vault may be dry assembled onto a solid masonry base. For good combustion and smoke exhaust, it is recommended to comply with the installation values provided and to use the handy smoke-fitting accessory.

The outer structure has the purpose of embellishing the oven and protecting it, containing the inner structure and isolating the refractory material vault.

# Cooking suggestions

With a Sunday® refractory material oven, a range of Italian recipes can be cooked traditionally. The cooking methods are divided into two main types: direct flame cooking and “indirect” heat cooking.

In the first method, you cook with the direct heat of the fire lit inside the refractory material vault; it is the ideal system to roast meat, as well as fish and, obviously, real Italian wood oven pizza!

With the second system, the heat slowly transferred by the refractory material walls is used to bake bread or other delicate food like ham or Porchetta.

Type of oven	Minutes to reach temperature	Number of pizzas	Bread batch
VOLTA 120	60	6/7	14 Kg
VOLTA 100	60	5	10 Kg
VOLTA 80	60	3/4	8 Kg
